Security beyond the edge℠

THREAT DIAGNOSTIC

Understand Your Threat Reality™

Who are your cyber adversaries? What assets are they targeting and what are their methods? Compliance based, bare-minimum approaches to security don't answer these questions and don't provide a path to understanding your return on security investment. iSIGHT's Threat Diagnostic Services define your organization's ThreatScape®, giving you the ability to understand your unique threat landscape based on the environment in which your business operates in. Using this information, you can identify how to best align against adversarial skill sets and mitigate risks, while enabling an intelligence-led security approach to your information security program.

Threat Diagnostic: Building Your Threat Landscape

COLLECT. Network incident indicators (e.g. Firewalls, IDS, DNS logs, etc.)

ANALYZE. iSIGHT Partners' pool of millions of threat indicators is leveraged to correlate and contextualize

CONFIRM. Associations are confirmed, exposing tactical & strategic threat realities

INFORM. Threat understanding enables an informed security control profile capable of mitigating your organization's risk

COLLECT · ANALYZE · INFORM · CONFIRM
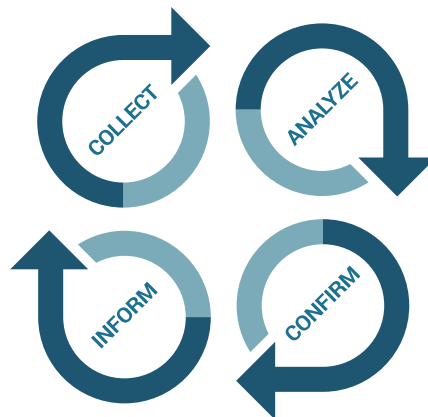

Have Your Intelligence Needs Met

BASELINE. Leverage the Threat Diagnostic to create a baseline of your threat profile and build an efficient information security program.

UPDATE. To stay up-to-date and informed, the Threat Diagnostic is designed to not simply provide a one-time snapshot, but can be used for periodic threat profile updates.

DUE DILIGENCE. Taking into account existing and emergent SEC guidelines, regulation and possible liability issues, Threat Diagnostics provide a trusted third party assessment that is actionable.

iSIGHT Partners' Threat diagnostic services add meaning to your environmental indicators to identify the portions of the threat landscape applicable to your organization.

iSIGHT Partners Works with Your Teams to Help You:

- Understand who's targeting you, why they're targeting you and what they're targeting you with

- Understand the threat landscape you operate in and uncover evidence of previously unknown activity

- Identify security control profiles capable of preventing and detecting threat source action identified during an engagement

"Blackstone has relied on iSIGHT Partners for the past year to understand and interpret our cyber threat environment."

Blackstone

Key Threat Diagnostic Components

GATHERING THE RIGHT NETWORK AND HOST BASED INDICATORS. The key to any successful diagnosis is identification of the relevant indicators to analyze. iSIGHT Partners works with your teams to identify logs - whether firewall, IDS, proxy, DNS or others – necessary for successful diagnosis and, when gaps exist, provides solutions to fill them.

INTERROGATING THE ISIGHT PARTNERS INTELLIGENCE DATABASE. Extracted indicators are correlated against iSIGHT Partners' intelligence, which includes millions of threat indicators connected to information on threat sources, associated tools, tactics and infrastructure – information necessary to identify threat activity and its underlying purpose.

LEVERAGE A GLOBAL NETWORK OF SECURITY ANALYSTS. iSIGHT Partners employs experts in multiple threat and security domains (across 16 different countries) to continuously identify threat indicators relevant to your organization. These indicators inform the search for evidence of threat activity across your entire attack surface.

INTELLIGENCE-LED, THREAT INFORMED SECURITY POSTURE. The final product is a view of the applicable portions of the threat landscape applicable to your organization. Identifying key threat realities involving actor groups, their capabilities, motivations and intentions helps you better inform your control profile for existing and emergent threat activity.

Bottom Line

Whether establishing a baseline profile or updating your visibility, iSIGHT's Threat Diagnostic Services enable global companies to align business decisions to the threat realities that they face, establishing a gateway to accurately measuring risk and your return on security investment.

About iSIGHT Partners

From actionable ThreatScape intelligence and integration, to our exclusive ThreatSPACE practice range, iSIGHT Partners provides the tools and services Fortune 100 companies and governments need to face constantly changing cyber threat landscapes. iSIGHT Partners not only delivers detailed, actionable ThreatScape intelligence, but offers services that inform businesses about real threats to their systems. iSIGHT Partners even allows those enterprises to instantly evaluate and neutralize threats with our patented Cyber Risk Management System (iCRMS).
