

CYBER THREAT INTELLIGENCE FOR FINANCIAL SERVICES

A trusted third party for the financial community

Proactively take measures to protect your security, operations and reputation by joining iSIGHT Partners community. While the complexity of cyber security within the financial services sector is increasing, enterprises armed with ThreatScape® intelligence are prepared for anything the threat environment has to offer. By creating intelligence from continuously monitoring threats, iSIGHT Partners helps Fortune 100 financial sector companies protect critical information and assets from intrusion.

iSIGHT Partners partnership with FS-IAC means that enterprises can feel secure that their cyber security and financial strategies are properly aligned. From actionable intelligence reports and integration, to the exclusive ThreatSPACE® live-fire practice range, iSIGHT Partners provides the tools and services enterprises need to understand and mitigate the cyber threats they face.

ThreatScape® Intelligence Aligned to Financial Services:

CYBER CRIME. ThreatScape® Cyber Crime focuses on cyber threats from financially motivated actors, including those that are directly involved or facilitate credential collection, fraudulent monetization, and money laundering.

CYBER ESPIONAGE. ThreatScape® Cyber Espionage focuses on providing intelligence on targeted intrusion operations aimed at corporate entities to collect information for the purpose of a strategic advantage.

HACKTIVISM. ThreatScape® Hacktivism focuses on politically or ideologically motivated actors who express their beliefs or attempt to project power through malicious or destructive online activity.

Contact iSIGHT Partners for details on additional ThreatScape intelligence offerings.

iSIGHT Partners Helps You:

- Understand your threat environment by analyzing threat sources who use common techniques to achieve common impacts
- Understand the threat landscape you operate in and uncover evidence of previously unknown activity
- Identify threat source activities that assist in creating and employing appropriate security controls relevant to your unique environment

“After experiencing the value of iSIGHT’s cyber intelligence first hand, we quickly reoriented our thinking toward Blackstone’s portfolio companies and the value this product could add to their businesses.”

LAURENCE TOSI
 Chief Financial Officer
 Blackstone

Intelligence-Led Security Solutions

ThreatScape[®] intelligence arms enterprises with tactical, operational and strategic insights and forms the basis for connecting the security operation to the business.

ThreatService[™] offerings inform organizations about the actual threats targeting them while enabling threat management based in in-depth analysis. iSIGHT Partners ThreatService[™] offerings also allow organizations to integrate intelligence into their security operations and cyber risk management programs.

ThreatSPACE[®] cyber exercises provides a live-fire cyber range to perfect threat management and incident response. The ThreatSPACE[®] Range and Training Facility includes environments that support an extensive range of topologies and targets that can be designed after nearly any industry or government office.

iCRMS[™] automatically routes intelligence to operators and managers using iSIGHT Partners patented technology for incident handling and threat mitigation. This system enhances decisions such as threat prioritization and mitigation and enables increased awareness of countermeasure value.

These intelligence-led security solutions empower organizations to understand their cyber threat reality, bolster existing teams with actionable intelligence, and enhance readiness to proactively prevent mission impact.

Bottom Line

Without true intelligence containing more than just technical insights, financial institutions are simply deploying defenses blindly. iSIGHT Partners enables an intelligence-led security practice that connects awareness of the threat to all facets of the business.

About iSIGHT Partners

iSIGHT Partners is a global cyber threat intelligence firm that delivers actionable intelligence products and services to leading enterprises in business and government. With a global network of security analysts and geographic research and analysis centers in Washington DC, The Netherlands, Brazil, Ukraine, India and China, iSIGHT Partners is uniquely positioned to monitor and mine the cyber threat ecosystem and deliver proprietary intelligence products and services specific to the threats its clients face.
